Evaluation Criteria

1. **Impact:**

   To evaluate the effectiveness of the submitted work; we consider the impact it has on the sustainability of the environment, society, and economy. Additionally, we assess the scalability and adaptability of the proposed solutions in various dryland regions, as well as their practicality and feasibility in real-world situations.

2. **Innovation:**

   To evaluate this, we assess the originality and creativity of the submitted work in addressing food-related challenges in dryland regions.

3. **Relevance:**

   To evaluate this, we measure to what extent the submitted work is related to the prize field and objectives.
